Metric Spaces

Satish Shirali, Harkrishan Lal Vasudeva

Metric Spaces Satish Shirali, Harkrishan Lal Vasudeva

This volume provides a complete introduction to metric space theory for undergraduates. It covers the topology of metric spaces, continuity, connectedness, compactness and product spaces, and includes results such as the Tietze-Urysohn extension theorem, Picard's theorem on ordinary differential equations, and the set of discontinuities of the pointwise limit of a sequence of continuous functions. Key features include: a full chapter on product metric spaces, including a proof of Tychonoff's Theorem a wealth of examples and counter-examples from real analysis, sequence spaces and spaces of continuous functions numerous exercises – with solutions to most of them – to test understanding. The only prerequisite is a familiarity with the basics of real analysis: the authors take care to ensure that no prior knowledge of measure theory, Banach spaces or Hilbert spaces is assumed. The material is developed at a leisurely pace and applications of the theory are discussed throughout.

From reader reviews:

Deborah Mazzeella:

Reading can called thoughts hangout, why? Because when you find yourself reading a book particularly book entitled Metric Spaces the mind will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely can be your mind friends. Imaging each word written in a reserve then become one contact form conclusion and explanation in which maybe you never get ahead of. The Metric Spaces giving you a different experience more than blown away your thoughts but also giving you useful details for your better life on this era. So now let us show you the relaxing pattern is your body and mind will likely be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Garland Thorpe:

The book untitled Metric Spaces contain a lot of information on it. The writer explains the girl idea with easy method. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read this. The book was compiled by famous author. The author brings you in the new period of literary works. You can read this book because you can read more your smart phone, or model, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site as well as order it. Have a nice examine.

Jerry Deal:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library as well as to make summary for some guide, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Metric Spaces can make you experience more interested to read.

Cheryl Bullen:

Reserve is one of source of information. We can add our knowledge from it. Not only for students but additionally native or citizen require book to know the change information of year in order to year. As we know those guides have many advantages. Beside most of us add our knowledge, also can bring us to around the world. Through the book Metric Spaces we can acquire more advantage. Don't one to be creative people? To be creative person must love to read a book. Merely choose the best book that ideal with your aim. Don't always be doubt to change your life with this book Metric Spaces. You can more attractive than now.
