A range of international events have recently focused attention on issues of prejudice, racism and social conflict: increasing tensions in former Eastern bloc countries, political conflict in Northern Ireland and the United States, as well as racial conflict in the Baltic States, Middle East, Africa, and Australasia. In light of these events, **Understanding Prejudice, Racism and Social Conflict** presents a timely and important update to the literature, and makes a fascinating textbook for all students who need to study the subject.

A variety of theoretical and conceptual approaches are necessary to fully understand the themes of prejudice and racism. This textbook successfully presents these, uniquely, by examining how these themes manifest themselves at different levels - at the individual, interpersonal, intergroup and institutional levels. It aims to integrate the different approaches to understanding racism and prejudice and to suggest new ways to study these complex issues. This integrated, international focus should make it key reading for students in many countries.

With contributions from world-leading figures, **Understanding Prejudice, Racism and Social Conflict** should prove to be an invaluable teaching resource, and an accessible volume for students in social psychology, as well as some neighbouring disciplines.
