Changing Destinies: The Re-start Infant Family Programme for Early Autistic Behaviours (United Kingdom Council for Psychotherapy Series) Stella Acquarone, Isabel Jimenez Acquarone

The term "pre-autism" is becoming more widespread as a result of growing awareness of the importance of a child's first three years of life in diagnosing behaviors which, if untreated, can develop into autism. In this book we are shown the problems parents can experience when their young child does not respond to them in a "typical" way, how they often voice concerns that something is "not quite right" with their child, and how it is important to address these concerns, which may be signs of pre-autism.

This book is about a new approach called "Re-Start", developed by Stella Acquarone, to diagnose and treat early autism. In the Re-Start infant/family program, a multidisciplinary team works with the parents and through the family relationships to reconfigure dysfunctional dynamics with the aim to "change destinies."

In the first section of the book we learn about the up-to-date research in psychoanalysis, neurobiology, and pediatrics which underpin the Re-Start intensive program. In the second section, the program itself is described in three parts: assessment, therapy, and follow-on care continuing the progress made during treatment in the child's home environment. With this three-pronged approach, a child's early behaviors can be monitored and changed, giving a baby the best chance to develop into a healthy child, and even enter mainstream education. A sample timetable of the three-week intensive intervention is included as well as the scales and graphs used to assess the relationship and monitor progress in four areas: interpersonal, sensorial, motor and affect. In the third section we are presented with the testimonies of parents who have taken part in the program.

This book is equally important both as a documentation of a successful treatment model for researchers and clinicians, and as an aid for concerned parents to understanding pre-autistic behaviors and taking the necessary steps to help themselves and their children.

Steve Henry:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Changing Destinies: The Re-start Infant Family Programme for Early Autistic Behaviours (United Kingdom Council for Psychotherapy Series) can make you feel more interested to read.
