Autonomic Nervous System (Handbook of Clinical Neurology)

Autonomic Nervous System (Handbook of Clinical Neurology)

Autonomic Nervous System provides an introduction to the latest science and detailed chapters on advances in the clinical diagnosis and treatment of autonomic system disorders.

The autonomic nervous system controls all involuntary actions within the human nervous system. Core body functions regulated by the autonomic system include breathing, heartbeat, blood pressure, body temperature, perspiration, and bowel, bladder and sexual function. Our understanding of the neurotransmitters associated with the autonomic nervous system has expanded over the past 15 years associated with current research efforts and are now impacting the diagnosis and treatment of autonomic nervous system disorders by clinical neurologists. This volume is a valuable companion for neuroscience and clinical neurology researchers and practitioners.

- A volume in the *Handbook of Clinical Neurology* series, which has an unparalleled reputation as the world's most comprehensive source of information in neurology
- International list of contributors, including the leading workers in the field
- Describes the advances that have occurred in clinical neurology and the neurosciences and their impact on the understanding of neurological disorders and on patient care
