Protein Folding and Metal Ions: Mechanisms, Biology and Disease

Protein Folding and Metal Ions: Mechanisms, Biology and Disease

The role of metal ions in protein folding and structure is a critical topic to a range of scientists in numerous fields, particularly those working in structural biology and bioinorganic chemistry, those studying protein folding and disease, and those involved in the molecular and cellular aspects of metals in biological systems.

Protein Folding and Metal Ions: Mechanisms, Biology and Disease presents the contributions of a cadre of international experts who offer a comprehensive exploration of this timely subject at the forefront of current research.

Divided into four sections, this volume:

- Provides case study examples of protein folding and stability studies in particular systems or proteins that comprise different metal ions of co-factors
- Reviews the proteins that shuttle metal ions in the cell to a particular target metalloprotein
- Illustrates how metal binding can be connected to pathological protein conformations in unrelated diseases, from cancer to protein deposition disorders such as Parkinson's disease
- Addresses protein redesign of metal-containing proteins by computational methods, folding simulation studies, and work on model peptides — dissecting the relative energetic contribution of metals sites to protein folding and stability

Together, the 13 chapters in this text cogently describe the state of the science today, illuminate current challenges, propose future possibilities, and encourage further study in this area that offers much promise especially with regard to novel approaches to the treatment of some of the most challenging and tragic diseases.

From reader reviews:

Sylvia Harrington:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to often the Mall. How about open or perhaps read a book called Protein Folding and Metal Ions: Mechanisms, Biology and Disease? Maybe it is to become best activity for you. You understand beside you can spend your time with your favorite's book, you can better than before. Do you agree with its opinion or you have additional opinion?

Frank Bullard:

Are you kind of occupied person, only have 10 or maybe 15 minute in your morning to upgrading your mind skill or thinking skill also analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because this all time you only find guide that need more time to be examine. Protein Folding and Metal Ions: Mechanisms, Biology and Disease can be your answer given it can be read by an individual who have those short extra time problems.

Jennifer Ruiz:

Reading a book to be new life style in this 12 months; every people loves to examine a book. When you study a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and also soon. The Protein Folding and Metal Ions: Mechanisms, Biology and Disease provide you with new experience in examining a book.

Tammara Dejesus:

You are able to spend your free time to see this book this publication. This Protein Folding and Metal Ions: Mechanisms, Biology and Disease is simple to create you can read it in the park, in the beach, train along with soon. If you did not include much space to bring typically the printed book, you can buy typically the e-book. It is make you better to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
