## **How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything**

Phil Jergenson, Richard Jergenson, Wilma Keppel

Grid beam is a modular, reusable building system that is fast, easy, affordable, and virtually goof-proof. Ordinary people with few skills and even fewer tools (all you need is a wrench!) can tackle projects ranging from furniture and shop benches to more ambitious projects like wind turbines, truck racks, small buildings—even electric vehicles.

Grid beam's modular pieces and bolt-together construction make the system fast and straightforward to work with. It has all the advantages of an industrial building system: standard, modular sizes; uniform materials; and interchangeable parts. Projects knock flat and are easy to transport. Since the pieces can be used over and over again, grid beam is easy both on your wallet and on the environment—the authors have been using some of their components for over thirty years.

*How to Build with Grid Beam* includes hundreds of photos of real projects built over a sixty-year period, showing the many uses of grid beam, from shelves for college students to projects involving alternative energy. The versatility of grid beam is inspiring for beginners, more experienced do-it-yourselfers, and innovators who will develop their own designs. Even school-age children can use grid beam to build simple projects.

**Phil Jergenson** is an innovator who built the first grid beam vehicle.

**Richard Jergenson** built his first grid beam project in 1977.

**Wilma Keppel** is a writer and editor who is also a welder, carpenter, and grid beam builder.

### **From reader reviews:**

#### **Frances Norman:**

The actual book *How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything* will bring someone to the new experience of reading a book. The author style to spell out the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book *How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything* is much recommended to you to read. You can also get the e-book through the official web site, so you can quicker to read the book.

#### **Madelyn McDowell:**

The actual book *How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything* has a lot of information on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. The author makes some research previous to write this book. This particular book very easy to read you will get the point easily after reading this book.

#### **Bella Singer:**

Reading can called head hangout, why? Because when you are reading a book specially book entitled *How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything* your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely can become your mind friends. Imaging just about every word written in a book then become one type conclusion and explanation which maybe you never get previous to. The *How to Build with Grid Beam: A Fast, Easy and Affordable System for Constructing Almost Anything* giving you an additional experience more than blown away your brain but also giving you useful facts for your better life on this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

#### **Vanessa Gibson:**
