Weariness of the Self Alain Ehrenberg

Drawing on the accumulated knowledge of a lifetime devoted to the study of the individual in modern democratic society, Ehrenberg shows that the phenomenon of modern depression is not a construction of the pharmaceutical industry but a pathology arising from inadequacy in a social context where success is attributed to, and expected of, the autonomous individual. In so doing, he provides both a novel and convincing description of the illness that clarifies the intertwining relationship between its diagnostic history and changes in social norms and values.
