Construindo APIs REST com Node.js: Caio Ribeiro Pereira (Portuguese Edition) Caio Ribeiro Pereira Hoje em dia, é muito comum criar aplicações client-side para web e mobile que consomem dados de uma API (Application Programming Interface), que são sistemas back-end focados apenas no processamento e envio de dados, de forma centralizada. Isso permite que sejam desenvolvidas múltiplas aplicações clientes com interfaces específicas para usuários mobile, desktop ou web. Desde 2010, o Node.js provou ser uma excelente plataforma escalável na solução de diversos problemas, principalmente para construção de APIs RESTful.

Neste livro, Caio Ribeiro Pereira mostra na prática os motivos por que optar pelo Node.js, que é uma plataforma altamente escalável e de baixo nível. Nele, você vai aprender boas práticas sobre como construir uma API utilizando código ECMAScript 2015 (aka ES6) e frameworks populares como Express, Passport, Apidoc, Mocha e muito mais.

O projeto será integrado com banco de dados relacional através do Sequelize.js e, para finalizar, será construída uma aplicação cliente web em formato SPA (Single Page Application) utilizando apenas o melhor do mais puro Vanilla JavaScript.
