Neoplastic Hematopathology: An Atlas and Concise Guide Cherie H. Dunphy MD

Neoplastic Hematopathology provides a concise, visual approach to guide practicing pathologists, hematopathologists, hematologists, oncologists, internists, and trainees to a clear analysis and diagnosis of myeloid and lymphoid specimens. Coverage is comprehensive and for each entity includes a short text description of the key points of the entity- definition; morphologic features; special stains, immunohistochemistry and flow cytometry techniques; differential diagnosis; diagnostic features; special issues (e.g., prognostic or other considerations to note). Images in *Neoplastic Hematopathology* highlight differential diagnostic features, especially the correlation and integration of standard H & E stains with molecular and immunologic techniques.

Neoplastic Hematopathology: An Atlas and Concise Guide features:

- Clear, concise coverage across the wide range of hematopathologic entities based on the current World Health Organization (WHO) classification
- Topics selected on the basis of "must-know" entities for the practicing pathologist or trainee
- Emphasis on integration of routine and special stains with immunologic and molecular techniques, reflecting the most current standards of practice
- Outstanding images selected to highlight key differential points and potentially misleading variants
