Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences)

This book presents the state-of-the-art of optical remote sensing applied for the generation of marine climate-quality data products, with contributions by international experts in the field. The chapters are logically grouped into six thematic parts, each introduced by a brief overview. The different parts include: *i.* requirements for the generation of climate data records from satellite ocean measurements and additionally basic radiometry principles addressing terminology, standards, measurement equation and uncertainties; *ii.* satellite visible and thermal infrared radiometry embracing instrument design, characterization and, pre- and post-launch calibration; *iii.* *in situ* visible and thermal infrared radiometry including overviews on basic principles, technology and measurements methods required to support satellite missions devoted to climate change investigations; *iv.* simulations as fundamental tools to support interpretation and analysis of both *in situ* and satellite radiometric measurements; *v.* strategies for *in situ* radiometry to satisfy mission requirements for the generation of climate data records; and finally, *vi.* methods for the assessment of satellite data products.

Fundamentals of measurement theory are taken through to implementation of practical ground based radiometers and their application to validate satellite data used to generate climate data records. This book presents practical solutions for those involved or contemplating the validation of optical climate measurements from satellite instruments.

- Exhaustive coverage of important topics
- Fundamental and advanced discussions of many types of instruments
- Emphasis on calibration and uncertainty analysis of results

From reader reviews:

Thomas Jones:

Book is to be different for every grade. Book for children until adult are different content. We all know that that book is very important usually. The book Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences) had been making you to know about other know-how and of course you can take more information. It is quite advantages for you. The reserve Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences) is not only giving you much more new information but also to be your friend when you sense bored. You can spend your own personal spend time to read your reserve. Try to make relationship together with the book Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences). You never truly feel lose out for everything in case you read some books.

Kathy Graves:

Why? Because this Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences) is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will zap you with the secret that inside. Reading this book adjacent to it was fantastic author who write the book in such incredible way makes the content on the inside easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This book will give you a lot of rewards than the other book get such as help improving your proficiency and your critical thinking technique. So , still want to hold off having that book? If I had been you I will go to the e-book store hurriedly.

Karen Tullis:

Reading can called head hangout, why? Because if you find yourself reading a book particularly book entitled Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences) your mind will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely might be your mind friends. Imaging every word written in a reserve then become one contact form conclusion and explanation that maybe you never get before. The Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences) giving you one more experience more than blown away your brain but also giving you useful details for your better life in this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will probably be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

Debra Shortt:

A lot of book has printed but it is different. You can get it by world wide web on social media. You can choose the very best book for you, science, comedian, novel, or whatever by searching from it. It is called of

book Optical Radiometry for Ocean Climate Measurements (Experimental Methods in the Physical Sciences). You can include your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make you happier to read. It is most essential that, you must aware about publication. It can bring you from one destination to other place.
