Beatrice Gormley

Marie Curie: Young Scientist (Childhood of World Figures) Beatrice Gormley

Marie Curie was a world-renowned scientist who made many important discoveries, as well as a great teacher and a mother, but her accomplishments didn't come easily.

Born Maria Sklodowska in 1867, Marie grew up in Russia-occupied Poland where schools were not allowed to teach Polish history or language, and lab experiments were forbidden in science classes. When Marie was young, her mother and eldest sister both passed away. Marie was determined not to let hardships get in the way of her dreams. She went on to win two Nobel Prizes, one each in physics and chemistry, making her the first woman to win the award and first person ever honored with two of them.

Read all about the clever young girl whose hard work lead to brilliant contributions in the field of science.
