Cancer (Rehabilitation Medicine Quick Reference) Ki, MD Shin

Designed for the busy practitioner, *Cancer* provides succinct coverage of the assessment and treatment of a multitude of rehabilitation issues as they uniquely affect cancer patients. Broken into four sections with 66 alphabetically arranged topics, this go-to reference addresses the key concerns in cancer rehabilitation ranging from basic principles, exercise, and therapy interventions to acupuncture, massage, and end-of-life care. Primary conditions covered include bone marrow transplant, brain disease and tumors, hematologic cancer, metastatic bone disease, neurofibromatosis, and spinal cord compression. The largest section of the book is devoted to the myriad disease or treatment-related symptoms and medical issues endemic in the cancer population such as pain, anemia, anorexia, cognitive dysfunction, chemotherapy-related problems and radiation effects, lymphedema, fatigue, malnutrition, sleep disorders, spasticity, and much more.

Every entry is standardized for quick look-up in the office or clinic, and features description, etiology, risk factors, clinical features, natural history, diagnosis, red flags, treatment, prognosis, helpful hints and suggested readings.

All **Rehabilitation Medicine Quick Reference** titles provide:

- Consistent Approach and Organization—at-a-glance outline format allows readers to find the facts they need instantly
- Concise Coverage—of must-know information broken down into easy-to-locate topics
- Fast Answers to Clinical Questions—diagnostic and management criteria for problems commonly encountered in daily practice
- Hands-on Practical Guidance—for all types of interventions and therapies
- Multi-Specialty Perspective—ensures issues of relevance to all rehabilitation team members are addressed
