Interferometric synthetic aperture radar (InSAR) is a relatively new remote sensing tool that is capable of measuring ground-surface deformation with centimeter-to-subcentimeter precision at a spatial resolution of tens of meters over an area of hundreds to thousands of square kilometers. With its global coverage and all-weather imaging capability, InSAR has become an increasingly important technique for studying volcanoes in remote regions such as the Aleutian Islands. The spatial distribution of surface deformation data derived from InSAR images enables the construction of detailed mechanical models to enhance the study of magmatic processes.

*InSAR Imaging of Aleutian Volcanoes:*

- Provides a theoretical framework for InSAR observations and capabilities
- Discusses state-of-the-art InSAR analysis techniques
- Describes the structure, eruptive history, and magma composition of volcanoes along the entire Aleutian arc
- Presents conceptual models for the magma plumbing systems of Aleutian volcanoes based on InSAR results combined with geophysical, geological and geochemical observations.
- Synthesizes observations of deformation along the Aleutian arc and compares those results to other active arcs around the world.
- Is illustrated throughout with high-resolution color satellite radar images

### **From reader reviews:**

#### **Chris Bynum:**

Throughout other case, little people like to read book InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books). You can choose the best book if you appreciate reading a book. Provided that we know about how is important some sort of book InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books). You can add understanding and of course you can around the world by the book. Absolutely right, due to the fact from book you can learn everything! From your country until finally foreign or abroad you may be known. About simple matter until wonderful thing you may know that. Then you are experiencing problem with the book when compared with can satisfy your small amount of time to read it because this all time you only find book that need more time to be examine. InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books) can be your answer given it can be read by you who have those short spare time problems.

#### **Christopher Pipkin:**

Reading a book to become new life style in this calendar year; every people loves to examine a book. When you study a book you can get a lot of benefit. If you would like get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and also soon. The InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books) will give you a new experience in reading a book.

#### **Sally Canady:**

That book can make you to feel relax. This book InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books) was bright colored and of course has pictures around. As we know that book InSAR Imaging of Aleutian Volcanoes: Monitoring a Volcanic Arc from Space (Springer Praxis Books) has many kinds or style. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that.
