## **Economic Inequality and Policy Control in the United States** Mark Stelzner

The income share of the top one percent of the population in the United States has increased from a little over nine percent of national income in the 1970s to 22.46 percent in 2012 — a 144 percent increase. What is driving this astronomic growth in incomes for some? Is it possibly the result of non-meritorious forces? If so, how is this incredibly unequal development coexisted, and indeed worsened, in a political system based on equality?

In *Economic Inequality and Policy Control in the United States*, Stelzner tackles each of these questions, and, in order to further develop understanding, Stelzner looks to the past and analyzes our experience with income inequality and the orientation of laws and institutions from the Gilded Age through the New and Fair Deal. He concludes that we have the tools to tackle inequality at present—the same policies we used during the New and Fair Deal. However, in order to make change durable, we have to eliminate the undemocratic elements of our political system.
